# BEAT THE BANKER

The game seems very simple...  
20 identical, numbered briefcases stand on the stage.  
One is chosen.  
One contains \$600 - One contains \$1.  
The others - amounts in between.  
All you have to do is eliminate cases until you find out how much you've won.  
Or... take the Bankers offer at anytime to lock in your winnings. Like we said... it SOUNDS easy...

Even we don't know which case wins!

Imagine...  
There are 6 of the original 20 cases remaining...  
the \$1, \$5, \$125, \$200, \$400 and \$600 cases are still in play...  
The Banker offers you \$112 for your case...  
Do YOU take the offer?  
Do you tell him "no way, I believe in my original choice?"  
Do you kick yourself later or revel in your excellent judgement.

You'll never know until you get to play "Beat the Banker."
